whale

super power

(roll the super powers die)

## Super Powers

long-distance vision

swimming  
underwater

talking to animals

magnetic body

supernatural  
strength

time travel

## Pirate Adventure Dice Rules

You can play this game on your own or with any number of players.

First roll all eight story dice (keeping the red super powers die for later). Then weave together your very own pirate adventure tale involving the people, places and objects that are shown on the dice.

When the super powers symbol  is rolled, the storyteller may throw the special ninth die. Depending which image is shown, the hero or heroine is thereby given an incredible talent, such as the power to swim underwater or gain supernatural strength. Note that there are three super powers faces, creating the tantalizing possibility of having three super powers at once!

To make the game more challenging, try telling your story using each image in the order it is rolled. Or to make the game even more difficult (and even funnier), you can pass the story from one player to the next, trying to keep it going for as long as possible.
